

INTERWOOD FOREST PRODUCTS

A subsidiary of Fritz Kohl Veneer Mill, Karlstadt Germany

O Christmas Tree... a Spruce tree?

The custom of decorating a Christmas tree began in 16th century Germany where the abundance of Spruce trees offered each family an opportunity to select and decorate their special tree...

How sturdy God hath made thee!

Spruce wood is used in everything from general construction crates to highly specialized musical instruments. When sliced into veneer it offers a reliably long, straight, and clean vertical grain. Spruce was the wood of choice for beams in older buildings and now they have a second life as reclaimed material admired for its carpenter marks, knots and that natural patina that comes only with age.

Thy leaves are so unchanging...

As we know, it's those "unchanging leaves", even in the heart of winter, that signify the joy and cheer of the holiday season... and may all that joy and happiness be with you & your family this holiday season!

Veneer Visions is a quarterly newsletter showing the possibilities using wood veneer. Design concepts include architectural woodwork, luxury interiors, furniture, sustainable sourcing, and much more. Interwood Forest Products was established in 1987 as the US division of Fritz Kohl Veneer Mill in Karlstadt Germany.
