A subsidiary of Fritz Kohl Veneer Mill, Karlstadt Germany

## Neocon 2017

For many years Interwood has supplied Geiger with outstanding wood veneers and this year we're proud to report that many veneer species are on display in the Geiger International showroom. Hollow blocks of ascending height are each made using a different veneer specie. This installation is wonderful because it shows visitors the color range and character of natural wood without using stains or special finishes.

**An Eye for Birdseye.**

Popularity of Paldao veneer has been going strong for over a year now. At Neocon, Geiger workstations are clad in slip matched Paldao quarters treated with a mild stain for consistency (see detail below). However, in addition to the workstations Geiger's reception area is paneled in stunning Birdseye Paldao veneer. Birdseye figure is often admired in Maple but rarely found in other species.

### Interwood Veneer. Geiger Design.

Geiger may be known for their stylish workstations but this King Ebony credenza takes the cake. To cap off this show-stopping showroom Geiger put a twist on their famous Rosewood Credenza design. The original control sample, seen in this picture below, is almost indistinguishable from the credenza. All wood darkens or fades with time and this Ebony sample has been traveling with me for while and more heavily exposed to light.

*Veneer Visions* is a quarterly newsletter by Interwood Forest Products. Interwood was established in 1987 as the US division of Fritz Kohl Veneer Mill in Karlstadt Germany.
