

# INTERWOOD FOREST PRODUCTS

Veneer Visions | October 2017

## LET'S GET IT STARTED!

We're kicking off the fall with a brand new look. **Veneer Visions** will now be a full access pass into veneer news, inventory, inspiration, and education. You'll know what's on the horizon, you'll be inspired by the veneer of the month, and you'll return to work with a new piece of valuable veneer spec knowledge. Focus in on what interests you and *enjoy!*

---

### veneer of the month: Smoked Red Gum

From southern Connecticut to Central Florida, [this domestic](#) specie grows up to 30 meters tall with diameters reaching up to 3 meters. The figured heartwood is highly valuable in architectural worldwide. The sapwood is cream-colored and relatively uniform; the heart wood is of a reddish to dark-brown color both of which can alternate within one single log, thus creating a beautiful marble effect. When [smoked](#) these colors transform and take on a whole new decorative effect. (BONUS: The heart wood often has a silky sheen therefore it's been coined the name "Satin Walnut.")

---

### news: HUDSON YARDS

Hudson Yards is the largest private real estate development in United States History. 16 skyscrapers on top of an active railyard on Manhattan's far west side.

60,000 sqft of the finest Figured Anegre veneer found anywhere on this planet ready to be shipped out from our facility in Shelbyville Kentucky.

An achievement we're truly proud of.

---

### DID YOU KNOW?

Typical thickness for architectural wood veneer is .5mm (pencils are 1mm).
