The Royal Tree of Windsor Park

Under normal circumstances, royal property belonging to the crown of England is considered sacrosanct and most definitely not for sale.

One Lebanese Cedar tree from Windsor Park however, has become the big exception to this rule. Sold to Fritz Kohl since it had died 2 years ago and needed to be felled. It was planted in 1760 by the Duke of Cumberland, the third youngest son of King George II, who was nominated to be "Ranger of the Park" by the king and who turned the park into today's structure.

The British are coming! ...coming to Germany that is.

The tree was 6 feet in diameter and well over 26 feet long with the first 26 feet being pure veneer quality. During the veneer production of the tree, German television, radio and press were present to broadcast this "royal" event!

The produced quality of the Lebanese Cedar exceeded every expectation and resulted in a total of 130,404 sqft of the finest quality imaginable. Perfectly suited for a high-class project whose owner gets a unique product nobody else in the world will ever own. (translation of the linked articles can be found on ifpveneer.com)

Veneer Visions is a quarterly newsletter by Interwood Forest Products. Interwood was established in 1987 as the US division of Fritz Kohl Veneer Mill in Karlstadt Germany.
